## Replacement Walk-in Doors and Frames

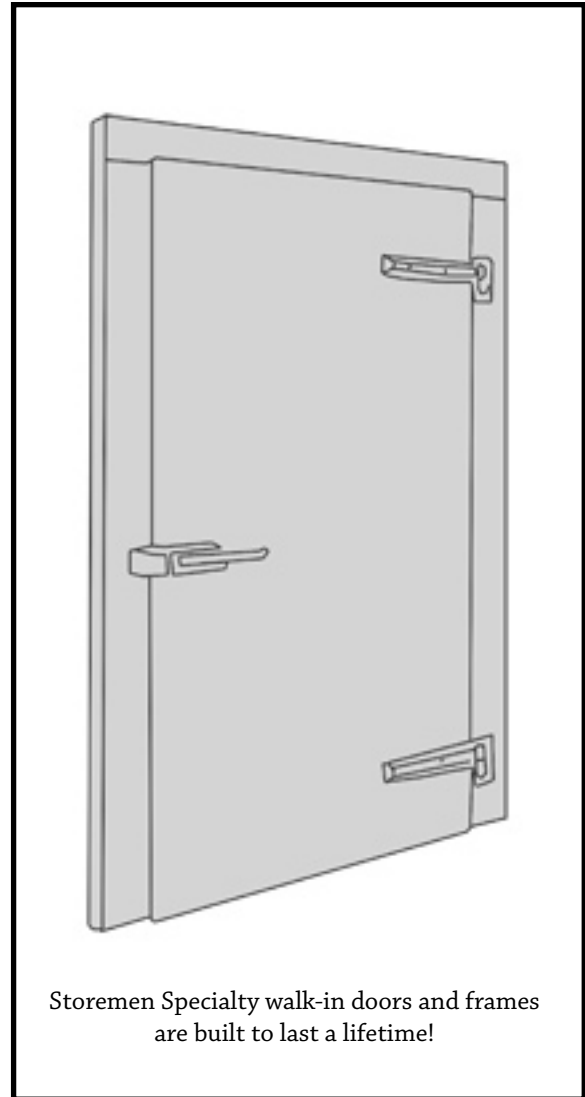

Does your walk-in door need to be replaced? Do you want to add a door to your existing walk-in freezer or cooler? *Storemen Specialty* manufactures replacement doors and frames to accommodate almost any type of walk-in.

*Storemen* offers a standard replacement door and frame to fit a 36" x 78" or 60" x 78" opening. We can, upon request, customize these doors to fit any size opening. Standard replacements are mill-finish, stucco-embossed aluminum inside and out.

Standard features include safety release hardware and cam lift hinges. Options include diamond-tread aluminum kick plates (one or both sides), vapor-proof light fixtures, pressure relief port for freezers, and door closure for 3' doors.

Doors are factory pre-hung on the frames to facilitate installation. If you do not have a maintenance department or prefer others to install, *Storemen* offers on-site installation. All doors and frames are UL approved and UL sanitation listed.

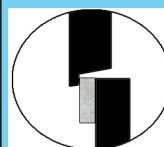

When ordering, please provide the following information: the dimensions of the finished door opening, the door thickness, door swing, and whether the application is for a freezer or cooler.

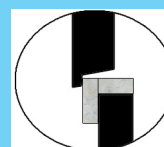

Storemen Specialty walk-in doors and frames are built to last a lifetime!

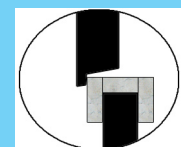

### Choose from three jambs:

Standard  
Flush Mount

Optional  
Insert Mount

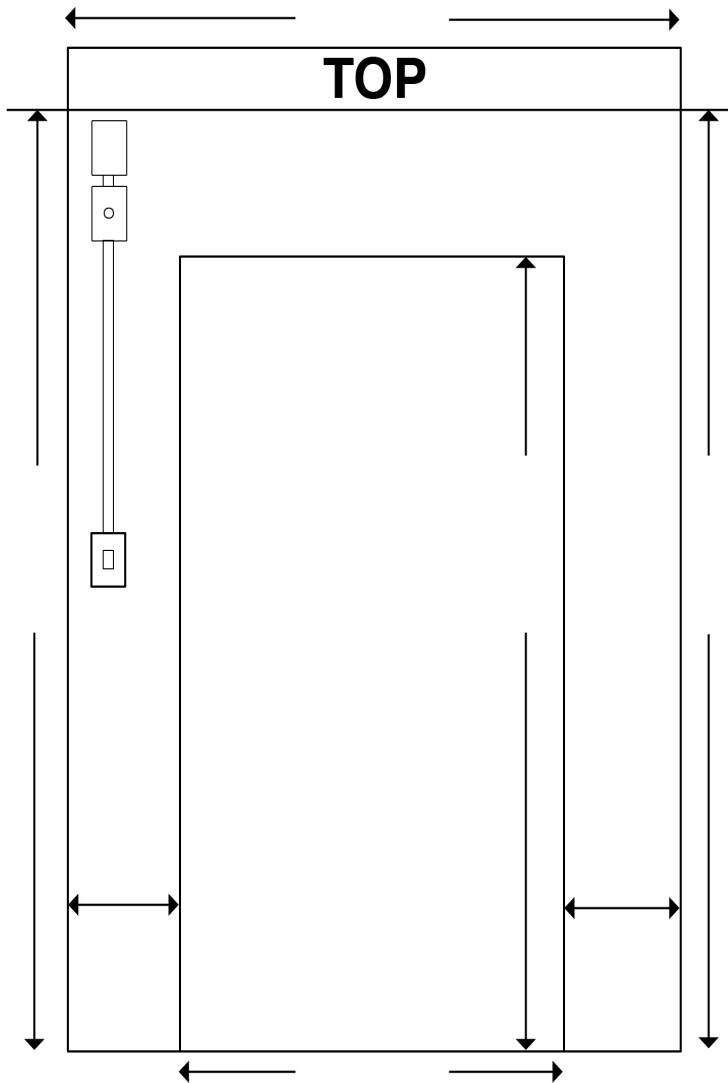

Optional  
Wrap-Around

## Call us for additional pricing on the following:

- \*Custom doors and jambs to fit any size opening.
- \*Embedded door jambs for extreme use.
- \*On-site installation at your facility.
- \*Insert mount and wrap-around mount.

*All door replacements include standard hardware and frames. Upgrades are recommended for heavy-duty applications or to replace existing components that are faulty. Freight and sales tax not included. There will be a \$150.00 crating fee on all doors and frames. This fee will be waived if you pick up or we deliver and install.*
